Tutorial	Problem	Submissions	Leaderboard	Discussions	Editorial

Loops are control structures that iterate over a range to perform a certain task.

There are two kinds of loops in Python.

A *for* loop:

```
for i in range(0, 5):
    print i
```

And a *while* loop:

```
i = 0
while i < 5:
    print i
    i += 1
```

Note Be careful about indentation in Python. Read more

Here, the term `range(0,5)` returns a list of integers from 0 to 5: $[0, 1, 2, 3, 4]$.
